The following is a quotation of the first paragraph of 35 U.S.C. §112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it in such full, clear, concise and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. §112, first paragraph, for failing to provide an enabling disclosure.

Applicants have alleged that "[w]ith A3.5, Ala-boroPro suppresses HIV below detectable levels in a manner similar to the anti-HIV effect of AST at 1 μ M". Applicants have also stated (p. 20) that Ala-boroPro and Pro-boroPro inhibit DP-IV *in vitro*. There is, however, no basis for applicants' proposition that for peptides in which "m" is greater than 0, enzyme inhibition will

they will recognize; the departures from tested embodiments which applicants are proposing could well abolish activity. Undue experimentation would be required of the skilled biochemist to determine which of the claimed peptides will inhibit DP-IV.

Claims 13-16 are rejected under 35 U.S.C. §112, first paragraph, for the reasons set forth in the objection to the specification.

The following is a quotation of the appropriate paragraphs of 35 U.S.C §102 that form the basis for the rejections under this section made in this action.

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2) and (4) of section 371(c) of this title before the invention thereof by the applicant for the patent.

Claims 13-15, 16 and 18 are rejected under 35 U.S.C. §102(e) as being anticipated by Bachovchin (USP 4,935,493).

Bachovchin teaches the following dipeptide:

Pro-boroPro.
